

Boarding Information

*** Please be aware that our boarding fees are charged by the day, NOT by the night. We also charge a \$2/day charge for medications administration if you bring medication for your pet to be given while boarding.**

*** Please call for our boarding rates**

*If you have more than one animal boarding & they can stay together in the same kennel, the first (and largest) animal is full price & each additional animal is half price. Dogs & cats cannot stay together.

*If your pets cannot eat together due to food aggression or not sharing, they CANNOT board together.

* We have a very small boarding kennel. Animals are placed in the largest kennel available & always are in a kennel large enough to ensure their comfort & safety. However we cannot "guarantee" or hold a certain kennel. Any animals that are very large or multiple animals staying together will be placed in the largest kennels first.

*Boarding fees are PER DAY. However if you pick up your animal within the first 30 minutes of opening time you will not be charged for that day. Any time past this is a full day charge. (Exception being Sunday)

* All boarding animals must be current on Rabies, Distemper & Bordetella (kennel cough) vaccines.

* All animals entering the kennel are checked for fleas & ticks. Any animals carrying parasites will be treated accordingly at the owner's expense. Any boarding animal actively passing intestinal parasites will be treated accordingly as well.

* We ask if you have a boarding reservation for a major holiday or summer weekend & are unable to keep the reservation, that you give 24 hours' notice. If no notice is given, your account may be charged for the original number of days reserved.

Effective 1/5/2010

Clients,

* Please be aware that our boarding fees are charged by the day, NOT by the night. We have also implemented a \$2/day charge for medication administration if your pet must have medications while in the kennel. Also, if you come by to pick up or drop off your animal from boarding hours that we are closed, you may be charged an after-hours pick up fee of \$65. This is for the safety of our employees.

* All animals that are in the clinic for routine procedures (bathing, spay/neuter, dental cleaning's) or boarding must be current on vaccinations. (Rabies, distemper, bordetella) Any animals having a surgical procedure must be current on heartworm testing. There will be an extra charge for female animals being spayed that are in heat, pregnant or excessively overweight.

* We also request that if you have a reservation for boarding on a weekend or major holiday & you are unable to keep the reservation that you give us 24 hours notices. If no notice is given your account may be charged for the original number of days reserved.

* Any animal coming into the kennels (whether for boarding, daycare, surgery, treatments, etc.) will be checked for fleas & ticks & treated accordingly at the owner's expense.

Please see the receptionist for details or concerns.

We apologize for any inconvenience & we appreciate your continued patronage.

Dr. Mark Lawrence & Staff
